

Generator answer

```
graph TD; A[Generator answer] --> B[Layer 1 sees answer + selected claim + replacement]; A --> C[Layer 2 sees answer + original passages no perturbation metadata]; B --> D[GPT-5.4 label-evaluator behavior label + adoption label]; C --> E[Blind matrix judges any source-error flag]; D --> F[Scoring compares adoption label vs. any-error flag revealing task/label mismatch]; E --> F;
```

Layer 1 sees
answer + selected claim
+ replacement

Layer 2 sees
answer + original passages
no perturbation metadata

GPT-5.4 label-evaluator
behavior label
+ adoption label

Blind matrix judges
any source-error flag

Scoring compares
adoption label vs. any-error flag
revealing task/label mismatch
