

Input
question + answer + answer-bearing passages

Select one answer-causal target proposition
present in answer and grounding

Closed perturbation menu
entity, temporal, numerical, relation, causal, ...

Rewrite every source-passage mention
explicit, paraphrased, or entailed

Deterministic leakage backstop
scan all passages for original value

Validation gates
1 type valid
2 answer-causal
3 globally consistent
4 no leakage
5 original contradicts perturbed

pass

Validated record
all five gates pass

fail any gate

Diagnostic record
retained with failure reasons
